

Compliance Basics (Review)

Release Detection Options

A. Tanks

 **Inventory Control & Tank Tightness Testing***

 **Manual Tank Gauging***

 **Monthly Monitoring (several methods)**

**may not be applicable for some UST systems*

be sure your system qualifies to use these methods

Compliance Basics (Review)

Release Detection Options

B. Piping

 **Suction - 2 kinds** (know the difference)

 **Pressurized- 2 forms of RD required**

→ **Catastrophic- ALLD, electronic**

→ **Periodic- Monthly monitoring or annual line tightness test**

Some continuous electronic devices can serve both functions. Sump sensors may also be acceptable for secondary containment

Compliance Basics (Review)

Corrosion Protection Options

- 1. Fiberglass Reinforced Plastic**
- 2. Cathodically Protected Steel**
- 3. Fiberglass-clad Steel tank**
